

Facebook is an online social media platform that has over 2 billion users across the globe. It was initially for university students but soon expanded out and since 2006, anyone over the age of 13 is able to join the platform. It is available on all devices from your desktop and laptop computer to smartphones and tablets. Users can add photos and videos, update their status, interact with others and catch up with the latest news. Despite requiring users to be over 13, there are no age verification measures and children can easily create an account. It's therefore important that parents familiarise themselves with the main features of the platform to ensure their young ones remain safe if and when they use it.

What parents need to know about FACEBOOK

ADDICTIVE NATURE

Facebook can be hugely addictive as it offers a physiological high and a quick reward cycle which comes from the likes and comments on shared posts. Communication is so instant now that teenagers are always checking, and it can sometimes feel like self-worth. This keeps children going back, encouraging them to post things and also increases the Fear Of Missing Out (FOMO) that is commonplace today. On the flip side, because of the way teenagers interact these days through Facebook and Facebook Messenger, they can seem addicted even when they're not.

CYBERBULLYING

Around a quarter of children have experienced online abuse, according to Ofcom's 2019 'Online Nation' report. Figures show that 23% have been cyberbullied, 39% subjected to abusive language and a fifth have been trolled. On Facebook, teenagers can receive communication in a number of ways, from private messages in Messenger to public comments on profiles, pages and posts to pages or groups set up just to torment a victim. Exclusion from pages or groups to cause the victim to feel left out has also been seen.

FUTURE IMPACT

Regardless of age, anything that's posted on Facebook, or other social media platforms, develops a personal brand and leaves a digital footprint that is there forever. It can be difficult to explain the consequences but many universities (and employers) look at Facebook before making a decision on accepting people. It is therefore wise to always think twice before posting anything online you wouldn't want people to hear or see offline.

STRANGERS/FAKE PROFILES

Generally, people are who they say they are online. That said, much like the real world, Facebook isn't free of malicious users and children have received friend requests from people they don't know, including individuals who may look to take advantage of young and impressionable children.

People you may know

OVERSHARING

Facebook encourages you to share "what's on your mind" but children need to be aware of what they're revealing about themselves online. Facebook allows users to share their location, create live videos and much more. Some photos can be traced using file data, too, so it's important to keep a tight group and share only with people you know.

INAPPROPRIATE ADS

While Facebook is getting ever stricter on the content of ads and who they are targeted to, there is still the chance that children could be subject to ads during their experience on the platform. This could be innocuous but is worth bearing in mind when using the app.

☒ Hide ad
never see this ad again

☒ Report ad
Tell us about a problem

☒ Why this ad?

☒ More options

LIVE STREAMING

Facebook Live provides users with the ability to stream video live-time to their friends and followers or watch other people's broadcasts live. During the video, people can react and comment and it's difficult to moderate the content given everything happens in real-time. This could mean your child is exposed to inappropriate material or worse still, could be cajoled into doing something online by others which they wouldn't normally do.

LIVE

42 people watching

PRIVATE MESSAGING

Facebook Messenger is closely linked to your Facebook profile and provides the ability to share private messages away from friends and family. It is therefore important that parents ask their children who they are communicating with and ensure that the only people they are exchanging messages with are people that they also know in real life.

Safety Tips For Parents

MAKE PROFILES PRIVATE

Within the settings of a Facebook account, you can choose whether a profile is public or private. Make sure that your child's setting is switched to private. This way they will only be able to interact with friends and people they know within the platform.

LEAD BY EXAMPLE

Show your children how and why you use Facebook. This will help to demonstrate that it can be used safely when used in an appropriate manner and help to reduce the risk of them encountering harmful content.

SHARE DEVICES

Depending on the age of your children, it's worth considering letting them use Facebook from a general family iPad or laptop. This allows them to use it without being constantly connected everywhere they go and may give you more reassurance around what they are doing on the app.

REPORT VIOLATIONS

On Facebook you're able to hide people or groups and report things that are harmful. Make sure you spend some time to show your children how this works and why it's important to do so before they start spending serious time on the platform.

Submit

RESPECT BOUNDARIES

As with anything, there are potential risks and dangers on Facebook but once you've talked about the ideas of safety on the platform, give children some space. Trust them to make smart choices but always be open to talking about social media.

CHECK-IN

Once they've had some time to use the platform, don't be afraid to check in and see if there's anything on Facebook they'd like to discuss. This isn't always easy but being open with your children is the best way to deal with any issues head on.

TikTok is a video-sharing social media app available on iOS and Android which lets users create, share, and view user created videos in a similar manner to Facebook, Instagram and Snapchat. Its main draw, however, is that users can record and upload bite-sized looping videos of themselves lip-syncing and dancing to popular music or soundbites, often for comedic effect, which can then be further enhanced with filters, emojis and stickers. TikTok has been designed with the young user in mind and has a very addictive appeal. At the beginning of 2019 it skyrocketed in popularity and has featured near the top of download charts ever since. Estimates suggest that it now has anything between 500 million and over 1 billion monthly active users worldwide.

What parents need to know about

TIKTOK

AGE-INAPPROPRIATE CONTENT

On the iOS store, TikTok is listed as 12+. On the Google Play Store it is rated as 'Parental guidance recommended'. When signing up to the app, it's possible to lie about your age without any form of verification. As children scroll through their feed, most of the videos they're likely to come across are light-hearted or designed to make people laugh. However there have been a number of videos reported for featuring drug and alcohol abuse, self-harm and young teens engaging in sexually suggestive content. More recently, suicide-themed related videos have been widely circulated. Given the deluge of material uploaded to TikTok every day, it's impossible to moderate everything and it can be common to come across explicit and age-inappropriate content on the 'for you' feed when logging into the platform.

INAPPROPRIATE MUSIC

TikTok revolves around creating music videos through lip-syncing and dancing. Inevitably, some of the music featured by users will contain explicit or suggestive lyrics. Given the undeniably young user base, there is a risk that children may look to imitate the explicit language they hear or the suggestive actions they see when viewing others user's videos on the app.

TIKTOK FAME

TikTok is very image focused and there is a notable preoccupation with appearing cool and attractive. Many teenagers now attempt to go viral and become what's known in-app as 'TikTok famous'. TikTok (and its predecessor musical.ly) has spawned its own celebrities – social media stars Loren Gray and Jacob Sartorius have been catapulted to fame through their initial exposure on the app. Obviously, most budding influencers looking to become the next big thing will be disappointed, but this may have the knock-on effect of making them go to more and more drastic lengths to get noticed.

ONLINE PREDATORS

As a social network, TikTok makes it easy to connect with other users. This includes the ability to comment on and react to other user's videos, follow their profile and download their content. Be aware that by default, any user can comment on your child's video if their account is set to public. Most interactions are harmless enough but as an app, TikTok is prone to predators because of the abundance of younger users.

ADDICTIVE NATURE

Social media is designed to be addictive and TikTok is no different. It can be fun and hugely entertaining. However, it is also because of this that it can be hard to put down. In addition to the short, punchy nature of the looping video format, the app's ability to keep you guessing what will come on screen next makes it easy to turn a five-minute visit into 45-minute visit.

IN-APP PURCHASES

Aside from the content, there's also the option to purchase in-app extras called 'TikTok coins'. Prices range from £0.99 for 100 coins to an eye-watering £93.99 for 10,000 coins. TikTok coins are used to purchase different emojis to reward content creators that a user finds funny or entertaining. In the iOS version of the app you can disable the option to buy TikTok coins but this sadly doesn't seem to be a feature in the Android version.

Safety Tips For Parents

TALK ABOUT ONLINE CONTENT

Assuming your child is above the age limit to use TikTok, make sure you take the time to talk to them about what they are seeing on the app. Have an open dialogue, get them to give you their opinion on what is appropriate and model the correct behaviour. Go over why they shouldn't give out private information or identifiable photos and be positive and understanding. In the long run, getting them to think critically about what they're seeing goes a long way to keeping them social media savvy.

USE PRIVACY SETTINGS

Undoubtedly, the easiest way to safeguard your child on TikTok is to make sure their account is set to private. This means only those users your child approves can view, like, and follow their content. Setting the account to private may clash with your child's goal of social media superstardom, but it will keep their account secure from strangers. This setting can be enabled under the privacy and safety menu by pressing the ellipsis in the 'me' tab of the app. To be extra safe, there are additional controls available to toggle such as who can send comments and messages, among other options.

ENABLE RESTRICTED MODE

In the digital wellbeing section there's the ability to turn on restricted mode using a PIN. Restricted mode filters out content that is not age appropriate although it should be noted that this isn't always 100% fool proof. When enabling restricted mode, parents should still be vigilant to what their child is watching and take note that the algorithm moderating content is not infallible.

MONITOR VIEWING HABITS

Even if it doesn't make you popular, keep a close eye on what your child is viewing and sharing on TikTok. Whilst the app has moderation tools, videos can still slip through the net so it's important to regularly check in on what they're watching. Understanding and learning the app yourself is a great way to get to grips with it. You could then even watch some videos with your child, turning it into a bonding opportunity also.

LEARN HOW TO REPORT AND BLOCK INAPPROPRIATE CONTENT

With the proper privacy settings in place, TikTok can be a relatively safe space for your child to express themselves. However, in case something does manage to slip through, make sure your child knows how to recognise and report content that isn't appropriate and get them to come to you about what they have seen. TikTok allows users to report offenders and comments within the app. You can also block individual users by going on their profile.

MODERATE SCREEN TIME

As entertaining as TikTok is, you can help your child moderate their time on the app by making use of the digital wellbeing section. Under the screen time management option, you can limit the daily allotted time allowed on the app in increments ranging from 40 to 120 minutes. You can also lock this preference behind a PIN number which has to be inputted in order to then exceed the daily time limit. This way your child can get their daily dose of memes without wasting away the day.

Meet our expert

FAMILY SAFETY MODE

TikTok Family Safety Mode allows parents to link their own TikTok account to their child's. It's a great way to oversee your child's digital wellbeing by giving you direct control over their safety settings and being able to remotely turn features on and off. This includes managing screen time, the ability to send and receive direct messages (and with whom) and the ability to restrict the appearance of content that might not be age appropriate.

Edit date: 29/05/19

Snapchat is a photo sharing app for mobile phones and tablets. The app allows users to share images, videos and chat with friends through voice call or text message. Users can share images and videos directly to specific friends, or through a 'story' shared with their entire friend list, which documents the previous 24 hours. In a study, Snapchat was ranked the 4th most negative app in terms of having an impact on young people's health and wellbeing, with children feeling that they can use the app Snapchat to "make you look pretty."

What parents need to know about SNAPCHAT

EXPOSING YOUR CHILD'S EXACT LOCATION

The 'Snap Map' lets you share your EXACT location in real-time through a map on the app. The user's location updates when the app has been opened on the device. There is a warning on the Snapchat website about uploading images and videos to 'Our Story' stating that "snaps you submit to 'Our Story' can still show up on the Map, no matter which location setting you choose!" When uploading to 'Our Story', your child's image or video could appear in "Search results and Stories on or off Snapchat - today or in the future."

ADDICTIVE SNAPSTREAKS

'Snap Streaks' are gained when snaps have been sent back and forth consecutively between friends. The longer that snaps are sent between users, the longer the streak becomes. Furthermore, Snapchat rewards users who have achieved high Snap Streaks, by gifting emojis, adding incentives for users to keep the streaks. Children invest time into making their streaks as long as possible, which can put an incredible amount of pressure on both themselves and their friendships.

SEXTING

While Snapchat's gimmick is that all photos, videos and text disappear eventually, users still have the capability to screenshot or record anything which has been sent to them. Users may sometimes forget that screenshotting is possible and send a compromising image or message to somebody who they think they trust. Due to 'Snaps' disappearing, (users can even send a one-second photo or video), Snapchat has become the chosen platform for children and young people to send sexually explicit images or 'selfies'. Once a photo/video has been screenshotted, or recorded using another device or software, this can lead to further dangers, such as blackmail and cyberbullying.

It is illegal to make, possess, download, store and share sexual images, photos and videos of a person under the age of 18. This also includes any sexual images, photos and videos that a child may have taken of themselves. However, if a young person is found creating or sharing images, the police can choose to record that a crime has been committed, but taking formal action isn't in the public interest.

EXTRAS TO MAKE YOU STAY

Aside from taking photos and videos, Snapchat has other elements to keep users coming back for more. 'Snap Games' is a feature within the app where users can play minigames with others on their friends list. The games function is easily accessed by tapping on the rocket button during a conversation. Another feature on the app is 'Snap Originals', which allows users to watch content created by Snapchat, celebrities and other accounts, including a mixture of comedy shows, drama, news and more. These features are designed to encourage users to stay on the app, which may be quite addictive.

DAMAGE TO CONFIDENCE

Snapchat's selection of filters and lenses are seen as a great way to enhance your 'selfie game'. Although the filters are often created to promote entertainment and humour, using the 'beatify' filters on photos can set unrealistic expectations and create feelings of inadequacy. Children may strive for admiration and appreciation by sending these 'edited' photos to their friend list. Judging themselves against other users on the app might threaten their confidence or self-worth.

Online
Safety®**

Top Tips for Parents

THE RISKS OF SEXTING

It can be slightly awkward talking about this topic with your child, but if it helps them protect themselves, it is worth it. Talk to them about the consequences of sexting and make sure that they're aware of the risks. Ensure your child knows that 'Snaps' can be screenshotted. Teach them that if they post anything potentially embarrassing or harmful (either of themselves or someone else) it can have severe consequences as the message, image or video can be shared further.

REPORTING A STORY, LENS, FILTER, SNAP OR MESSAGE

If your child comes across inappropriate Snapchat content sent directly to them or in another person's story, advise them to report it immediately. This may include an inappropriate lens, filter, message or snap. To report an offensive lens, they should open the app and select the lens they want to report. An info button will appear above the lens. Click this, followed by the flag icon. This will send a report to Snapchat for further investigation. Reports can also be made on the Snapchat support website: support.snapchat.com.

USE 'GHOST MODE'

We highly recommend enabling 'Ghost Mode' on the app so that your child's location will no longer be visible to anyone on the 'Snap Map'. To enable this, go onto the Snap Map and tap the cog in the top-right corner. Here, change the setting to 'Ghost Mode'.

HOW TO DELETE A MESSAGE

Advise your child never to send any negative messages (or images through gallery in the chat on the app) as screenshots can still be taken. You should also advise your child to screenshot any negative comments they receive as the sender can also delete them. To delete a message, simply press and hold the sent message and press delete.

TURN OFF 'QUICK ADD'

'Quick Add' helps friends find each other on the app. This is based on mutual friends or if their number is in their phone book. Explain to your child that this feature can open up their profile to strangers. We highly recommend that your child turns off the 'Quick Add' feature. This can be done in the settings.

RESTRICT STORY VIEWS

Your child can add videos and images to their 'Story' throughout the day which will last for 24 hours. By default, anyone in a user's friends list can see their story. We recommend checking the privacy settings to ensure that this has not been edited. This can simply be done in the app's settings under the 'Who Can View My Story' section. The options to choose from are 'My Friends', 'Everyone' or 'Custom' - we suggest that it is set to 'My Friends'.

What parents need to know about INSTAGRAM

Instagram is a hugely popular social networking app with over 1 billion users worldwide. The app, which is accessible on iOS and Android devices, allows users to upload images and videos to their feed, create interactive 'stories', exchange private messages or search, explore and follow other accounts they like. Images and videos can be transformed with an array of filters to edit the shot before sharing and anyone with an account can see others' online 'galleries' if their account is not private. To make posts easier to find, users can include searchable hashtags and captions to their uploads. That's why we've created this guide to help parents and carers understand exactly what Instagram is about.

AGE RESTRICTION
13+
Anyone over the age of 13 can create an account

LOCATION

#HASHTAG

HOOKED ON SCROLLING

Many social media platforms, Instagram included, have been designed in a way to keep us engaged on them for as long as possible. Behavioural economist, Nir Eyal, calls this the 'Hook Model' and the Instagram feed is a great example of this. Children and adults may find themselves scrolling to try and get a 'dopamine release'. Scrolling may become addictive and it can be difficult to stop until children find that 'something' they are looking for, quickly losing track of time as they get deeper into their Instagram feed.

SLIDING INTO DMS

Direct messages (or DMs) on Instagram allow users to share posts, images, videos, voice messages and calls between each other privately (or in a private group). Even if your child's account is set to private, anybody has the option to message them and send them content. If the person is not on your child's friends list, the message will still be sent to their inbox but the user has to accept their request to see the message.

INFLUENCER CULTURE

Influencers are sometimes paid thousands of pounds to promote a product, service, app and much more on social media. When celebrities or influencers post such an advert, they should add a disclaimer somewhere in the post which states that they have been paid for it. Commonly, this is well-hidden in the hashtags or in the comments of their post, making it unclear that their photo/video is actually an advert. This can be very misleading to young people who may be influenced into buying/wanting something promoted by somebody they admire, creating a false sense of reality and potentially affecting their mental health and wellbeing.

IMPACT ON WELLBEING

In a report by the RSPH, Instagram was ranked the worst for young people's mental health. Using filters on photos on Instagram can set unrealistic expectations and create feelings of inadequacy. Children may strive for more 'likes' by using realistically edited photos. Judging themselves against other users on the app might threaten their confidence or self-worth. In early 2019, Instagram banned images of self-harm and suicide, following the suicide of 14-year-old Molly Russell, who had reportedly been looking at such material on the platform. They since extended the ban to include drawings, cartoons and memes.

LIVE STREAMING TO STRANGERS

Live streaming on Instagram allows users to connect with friends and followers in real-time and comment on videos during broadcast. If your child's account is private, only their approved followers can see their story. It's important to note they may have accepted a friend request from someone they don't know, which means they could be live streaming to strangers. Children also risk sharing content they later regret, which could be re-shared online for years to come. Public accounts allow anybody to view, so we suggest your child blocks followers they don't know. In early 2019, data gathered by the NSPCC found that sex offenders were grooming children on Instagram more than on any other online platform.

IN-APP PAYMENTS

Instagram allows payments for products directly through the app. It operates under the same rules as Facebook Payments, which state that if you are under the age of 18, you can only use this feature with the involvement of a parent or guardian.

EXPOSING LOCATION

Public locations can be added to a user's photos/videos and also to their stories. While this may seem like a good idea at the time, it can expose the location of your child. This is particularly more of a risk if it is on their story, as it is real time. A photo which includes landmarks in the area, their school uniform, street name, house and even tagging in the location of the photo uploaded to Instagram can expose the child's location, making it easy to locate them. If their account is public, anyone can access their account and see their location.

HIJACKED HASHTAGS

Hashtags are an integral part of how Instagram works, but they can come with risks. One person may use a seemingly innocent hashtag with one particular thing in mind, and before you know it hundreds of people could be using the same hashtag for something inappropriate or dangerous that your child shouldn't be exposed to.

IGTV

Instagram TV (IGTV) works similar to YouTube. Users can watch videos from favourite accounts on the platform or create their own channel and post their own videos. It's important to note anyone can create an Instagram TV channel and doesn't have to be friends with a person to follow an account and watch their videos. In 2018 Instagram apologised and removed some of its TV content which featured sexually suggestive imagery of children. As the feature may encourage spending more time using the app, it's important to set time limits to avoid children's sleep or education being disturbed.

Top Tips for Parents & Carers

RESTRICT DIRECT MESSAGES

If your child receives a message from somebody they do not know, encourage them not to accept their message request and 'block' this person; this is the only way to stop them messaging your child again. Children can also 'tap and hold' the individual message to report it directly to Instagram as well as reporting the account itself.

LOOK OUT FOR #ADS

In 2019, the UK's Competition and Markets Authority launched an investigation into celebrities who were posting adverts on social media and not declaring that they were paid for. Influencers must clearly state that they have been paid for their posts, for example using a hashtag like #ad or #sponsored. Teach your child to look out for the signs of a paid post/advert and discuss with them that not everything they see from celebrities is their personal choice and opinion.

MANAGE NEGATIVE INTERACTIONS

If your child is receiving unwanted or negative comments, they can block that account so that they can't interact with them. This stops them seeing and commenting on their posts, stories and live broadcasts. In addition, your child can instantly delete unwanted comments from their posts, turn them off completely and control who can tag and mention them in comments, captions or stories, from everyone, only people they follow, or no one at all.

MANAGE DIGITAL WELLBEING

Instagram now has an in-built activity dashboard that allows users to monitor and control how much time they spend on the app. Users can add a 'daily reminder' to set a limit on how much time they want to spend on Instagram, prompting them to consider if it's been too long. In addition, once users have caught up with all the previous posts since they last logged on, they'll receive a 'You've completely caught up' message. Both features can help you have a conversation with your child about how much time they are spending on the app and to set healthy time limits.

PROTECT PERSONAL INFORMATION

Your child may unknowingly give away personal information on their profile or in their live streams. Talk to them about what their personal information is and make sure that they do not disclose anything, including their location, to anyone during a livestream, comment, direct message or any other tool for communication on the platform, even to their friends.

USE A PRIVATE ACCOUNT

By default, any image or video your child uploads to Instagram is visible to anyone. A private account means that you have to approve a request if somebody wants to follow you and only people you approve will see your posts and videos. Children should also use a secure password and enable a two-factor authentication to add an extra layer of security to their account.

FILTER INAPPROPRIATE COMMENTS

Instagram has an 'anti-bullying' filter, which hides comments relating to a person's appearance or character, as well as threats to a person's wellbeing or health. The filter will also alert Instagram to repeated problems so that they can take action against the user if necessary. This is an automatic filter, which should always be enabled. Children can also report abusive behaviour or inappropriate/offensive material directly to Instagram from the app. This includes posts, comments and accounts.

TURN OFF SHARING

Even though this feature will not stop people from taking screenshots, it will stop others being able to directly share photos and videos from a story as a message to another user. This feature can be turned off in the settings. We also recommend turning off the feature which automatically shares photos and videos from a story to a Facebook account.

REMOVE PAYMENT METHODS

If you are happy for your child to have a card associated with their Instagram account, we suggest adding a PIN which needs to be entered before making a payment; this will also help prevent unauthorised purchases. This can be added in the payment settings tab.

DON'T FORGET TO BE VIGILANT & TALK TO YOUR CHILD ABOUT THEIR ONLINE ACTIVITIES!

Meet our expert

Parven Kaur is a social media expert and digital media consultant who is passionate about improving digital literacy for parents and children. She has extensive experience of working in the social media arena and is the founder of Kids N Clicks, a web resource helping parents and children thrive in a digital world.

NEW FOR 2020 INSTAGRAM REELS

Instagram Reels is the latest update from Instagram that gives users the ability to record and edit 15-second multi-clip videos with audio, effects, and new creative tools. It is the app's answer to TikTok and can be accessed via the Stories feature. Reels can be shared with friends and family, however, if your child has a public account, it could be shared wider via 'Explore' and viewed by millions of strangers online.

#WakeUpWednesday

What you need to know about...

AGE RATINGS

What are they?

'Age Ratings'

A game's age rating can be used by adults to make an informed choice as to whether or not a game is suitable for their child. The PEGI (Pan European Game Information) system rates games and, instead of indicating the level of ability required to physically play a game, it indicates the suitability of content for that age group. 3, 7, 12, 16 and 18 are the labels that can be awarded to games and a variety of content descriptors such as violence, bad language and fear are used to further clarify why the label was assigned.

16 & UP ONLY

12-15

Know the Risks

18+

Inappropriate content

The biggest and most obvious risk of not following the age rating system is that children may view or hear age-inappropriate content. Many games now include scenes of a violent or graphic nature which could be upsetting or considered too intense for younger players.

Peer pressure

Peer pressure has a large role to play in age ratings being overlooked. Children don't want to be the ones left behind and can put their parents under pressure to allow them to play a game beyond the recommended suitability, especially when all of their friends are playing it already.

Level of 'Kudos'

Playing a game with a label that is higher than their age can be viewed by some children as a challenge and to gain a good reputation amongst friends. Kudos is attributed to the child playing the age inappropriate game resulting in more children wanting to follow suit.

Free Platforms

In order for a game to be released on popular platforms, such as PlayStation and Xbox, game developers must pay for a PEGI rating. However, smaller development teams are sometimes reluctant to pay these fees and games are often released on other platforms, such as Steam, without any age restrictions.

FREE

Spot the Signs

Being vague

Be aware of children being vague around the content of what they want to play. If they are unwilling to supply you with information about what the game is about, this can be an indicator that you wouldn't allow them to purchase it if you knew.

Unofficial sites

There are plenty of indie games that can be bought using online stores that don't necessarily have age restrictions. If you notice your child using sites such as GOG or itch.io rather than official channels such as the Google Play Store, they might be accessing games that aren't officially rated but still aren't age appropriate.

Unfamiliar terminology

Your child might start using phrases or terminology that is new to them or mimicking actions that they have learnt from a game without realising their inappropriateness.

Wanting to be secluded

Be aware if suddenly your child wants to move the device that they play their games on into a more secluded area of the house away from adults. It is a good idea for your child to play online games in shared area where you can see the screen.

Be aware of spending

Setting up accounts with online stores require bank account details. Keeping an eye on your bank balance means that you will be able to tell if there has been a new purchase and can provide you with an opportunity to ask about what new game they've purchased.

Safety Tips

Do your research

If you've noticed a new game that your child has downloaded then use quality resources to make sure that your knowledge is up to date. Online websites, such as National Online Safety, can provide you with the information you need.

Review parental controls

Review your parental controls on the stores where you buy games from. Most sites allow parents to set passwords to block games with certain age restrictions from being downloaded.

Encourage open dialogue

Encourage open dialogue with your child. You don't want to be in position where they won't talk to you if something has made them feel uncomfortable in a game because they are worried they will get in trouble for playing the game in the first place.

Discuss ratings

Talk to your child about why the game has been awarded a certain label. Debate the positives and negatives of playing a game and decide on some ground rules together.

What you need to know about... **GAMING STREAMERS & INFLUENCERS**

What are they?

'Gaming Streamers & Influencers'

Streamers are people who stream themselves gaming, drawing, making things etc. for people to watch on the internet. Usually this will be done live, and others are able to chat with them in real time while they do so. Influencers are social media stars who hold influence over the people that follow them, like a kind of trend-setter or taste-maker, who companies often pay to promote their products. A streamer could also be considered an influencer in their chosen area.

Know the Risks

Adult Content

Many streamers use platforms such as Twitch or YouTube to broadcast themselves. YouTube for example, is only for ages 13+ (YouTube kids is for under 13s) and may contain a lot of other adult content. Streamers themselves, may be unsuitable for younger audiences with the kind of content they make, and with many opting to stream live, anything can – and does – happen.

Authenticity Risk

A lot of streamers will have some kind of sponsorship deal in place with a company trying to sell their products to an audience. When the audience is mostly younger viewers, they may not realise that streamers are getting paid to promote a product and may not necessarily have their best interests in mind.

Bullying and hate

While some streamers do employ moderators to try and combat hateful comments or bullying in their comments sections, they can still be very hectic. Hateful language is quite common, and people looking to groom children or engage in online bullying behaviour, could frequent the live chats.

Subscriptions

Streamers also make money through subscriptions on websites like Twitch, where fans will donate them a small amount as little or as often as they like. Called 'bits', they can be bought in bundles of varying prices which can be gifted to streamers via 'cheers'. Children could buy these 'bits' in large amounts without realising what they're doing, leaving a big bill behind.

Safety Tips

Discuss what's real online

Be sure to teach kids the difference between what's real and honest, or fake and untrustworthy online. Photoshopping fake images and videos and bragging about themselves online is unfortunately quite commonplace so it is difficult to tell what is real or fake. People with large followings can be promoting unhealthy or unattainable lifestyles to children to boost their own online influence.

Use filters

There are filters that can be put in place to block out a lot of adult content on streaming sites. Just make sure you have access to children's accounts so you can set the parameters and keep track of what they're seeing yourself. Usually, parental controls will be located in the settings portion of an account's menu.

Check age settings

Both YouTube and Twitch state that they are not suitable for children under 13 years old, but other sites might be different. YouTube Kids, for example, is for ages 13 and under, and offers much of the same kid-friendly content that YouTube does without the risk of running into something improper.

Affiliate links

Keep an eye out for affiliate links in social media posts and tags like #ad. UK influencers have to follow the CAP Code for advertising standards, but many don't. It can be hard to tell who is working through legitimate channels because it's almost impossible to regulate. Many streamers encourage fans to buy merchandise through online shops and stores.

Action & Support

Name check streamers

If your child has begun showing an interest in a streamer or influencer, check their names on Google. Some popular streamers have been discovered flouting industry regulations and using their young audiences to enhance their personal wealth through scams whilst others may swear on streams or promote drinking, substance abuse or links to gambling sites they operate to their young audiences.

Talk to your child

Initiate an open dialogue with your child about the kind of content they're consuming online. Ask about their favourite streamers and whether they like their personalities or the games they play and the community they have. Also remind them about what they should and shouldn't be sharing about themselves online and that just because social media stars do it, it can also be damaging.

Block and report

If you suspect a streamer might be taking advantage of their audience, or worse grooming children in any way, and have irrefutable evidence, do not hesitate to block and report them. First, block your child from being able to view their content and alert other parents to your concerns. Go immediately to the police or local authorities with the evidence of what you've seen.

Our Expert Mark Foster

Mark Foster has worked in the gaming industry for 5 years as a writer, editor and presenter. He is the current gaming editor of two of the biggest gaming news sites in the world, UNILAD Gaming and GAMINGbible. Starting gaming from a young age with his siblings, he has a passion for understanding how games and tech work, but more importantly, how to make them safe and fun.

ROBLOX
Powering Imagination

According to the Roblox website, 'Roblox is the world's largest interactive social platform for play.' For those of you who are unfamiliar with the game, it is a multi-player online gaming platform which allows children to play and create a variety of games in a 3D world. Roblox is free to play and available on all modern smartphones, tablets, desktops, Xbox One, Oculus Rift, and HTC Vive.

AGE RESTRICTION
13+

What parents need to know about **ROBLOX**

ROBLOX STUDIO

The Roblox Studio allows users to create their own games and 'worlds' for others to play on the platform. As the games are user generated, it gives users the freedom to potentially include things you do not want your child to be exposed to, for example, weapons, violence and even pornographic content. There are no age restrictions on the games created in the Roblox Studio and to remove games from the platform Roblox relies on people reporting negative/violent content.

CHATTING & FRIEND REQUESTS

Whilst the games in Roblox are aimed at 8 to 18-year-olds, there are currently no age restrictions for signing up. This means that both adults and young people can play and communicate with each other and send friend requests through the platform. Once a friend request is accepted, this means that they can communicate with each other outside of gameplay.

ROBUX ONLINE PAYMENTS

When a user creates a game, they earn something called 'Robux,' which works as a currency within the platform and enables the purchase of upgrades and memberships. If the created game is of good quality and attracts multiple players and in-game adverts, children have the ability to earn a lot of 'Robux.' Once a user has earned a certain amount of Robux, they can convert this to real cash and withdraw it to a PayPal account. To withdraw money, users need to be over 13, have a PayPal account and have paid for the Roblox premium subscription.

Top Tips for Parents

ALERT!

Tell your children to be careful and to think twice before they click any random advert or popup. There a lot of phishing scams that advertise free roblox etc. with the intent of stealing your child's personal information.

UNLIST SOCIAL MEDIA ACCOUNTS

Make sure your child's social media accounts are not listed in the settings/account information. If they are, advise them to set them to private or remove them from their account. This will ensure that nobody will be able to find and contact them on their social media platforms outside of Roblox.

CHECK SHARED INFORMATION

In the account settings, check that your child is not giving away any personal information in their bio/profile. For example, their full name, phone number or snapchat name. If you see that they have, explain why this is potentially dangerous and remove immediately.

2-STEP VERIFICATION

Roblox has a great two-step verification security feature which we recommend you enable to add an extra layer of security to your child's account.

HAVE A CHAT ABOUT 'GRIEFING'

Griefing is when someone purposely upsets another player in a game. This can be done by setting traps, damaging or stealing something from another player, intentionally killing them and generally doing something in the game to spoil their gameplay. Essentially, 'Griefing' is a form of cyberbullying and can be extremely frustrating and upsetting for players.

RESTRICT PAYMENT METHODS

Roblox is a free to play game, but there are still options to make additional in-game purchases. If you do not want your child to make payments, ensure your card is not associated with their account. If you are happy for your child to make payments in the game, but want to restrict spending, we suggest using a games console gift card. These can be purchased in specific amounts, which will enable you to restrict how much your child spends and removes the need for a credit/debit card to be used with their account.

DISABLE IN-GAME CHAT

Roblox is great for children to play together and chat to each other. However, if you want to completely turn off in-game chat for your child (meaning they cannot contact anyone, including their friends) you can do so by following these steps: When logged in, go to the Account Settings page by clicking on the gear icon at the top right corner of the page, then click Settings. Next, click on the Privacy tab and under 'Who can chat with me in game?' select 'No one' and this will disable in-game chat.

IS YOUR CHILD UNDER 13?

Unfortunately, there are hundreds of YouTube videos showing children how to change their age settings on Roblox, so firstly, you should talk to your child to set up some rules/an agreement. There are additional safety features for children under 13, for example having their posts and chats filtered for inappropriate content and behaviour, so it is worth checking that your child has set up their account with the correct age. You can find this in their account settings.
